Wood Co., Publishers. 1887. Vol. I. of this most excellent series of works on the important art and science of midwifery, in its five hundred and nine pages, gives a very full, complete and concise, exposition of the anatomy of the internal and external genitalia, the functions of menstruation and fecundation, and normal pregnancy and labor. Vol. II., pp. 381, is devoted to the pathology of pregnancy, including all the intercurrent diseases to which the parturient female is liable, together with the diseases of the ovum, decidua, placenta, amnion, and foetus, together with miscarriage and extrauterine pregnancy. Vol. III., pp. 348, gives a most thorough and satisfactory consideration of the pathology of labor, concluding with a brief article on the uses of ergot. Charpentier s work is the most complete in any language on the subject of obstetrics, and is a clear and unbiased mirror of the theories and the practice of the most renowned obstetricians of the world. With his two years experience as head of the obstetrical clinic, at the Paris School of Medicine, and as adjunct to the1 chairs of obstetrics held by Professors Pajot and Depaul, he has necessarily kept abreast of the progress in this science, both in theory and practice, and his personal experience has been quite ample t- allow him to judge of the suggestions that have been made before and during his time. An excellent knowledge of the German and...
