

Major threats to marine biodiversity

By Huang Bei

LAP Lambert Academic Publishing Nov 2015, 2015. Taschenbuch. Book Condition: Neu. 220x150x5 mm. Neuware - Biodiversity is important for the survival and development of human society, affects various aspects of our lives, and is suffering from the rapid expansion of modern society and economy. At present, marine biodiversity faces various anthropogenic threats including land-based pollution, eutrophication, destructive fishing, habitat alteration, invasion of non-indigenous species and global climate change. Since such threats are commonly found in various areas in the NOWPAP region, NOWPAP is responsible for coordination of regional activities for assessment of the state of the marine and coastal environment, trying to develop a new marine environmental assessment method for marine biodiversity conservation. This book is one of NOWPAP activities on marine biodiversity, which assessed the status of biodiversity and environment protection in typical coastal zones of northern China and investigated the impacts of socio-economic development to the local biodiversity in a relatively long period using the PSR framework based on the data of social economic development during 2004-2013 and related ecological environment studies. 88 pp. Englisch.

Reviews

I just began looking over this pdf. It is one of the most amazing pdf i have study. I discovered this book from my dad and i recommended this pdf to understand.

-- **Merritt Kilback II**

Good e book and useful one. I have got read and that i am confident that i will likely to go through once more again later on. It is extremely difficult to leave it before concluding, once you begin to read the book.
