RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 48 pages. Original publisher: Washington, D. C. : U. S. Dept. of Labor, Bureau of Labor Statistics, Office of Productivity and Technology, 2005 OCLC Number: (OCoLC)216686068 Subject: Wages -- Iron and steel workers -- United States -- History. Excerpt: . . . and associated investment in experimentation with fast-obsolescing equipment raises costs without raising immediate revenue. Thus measured productivity declines at first; there is a productivity slowdown. Still, investments in equipment is optimal for the employer because it maximizes long run profits, compared to taking higher short run profits but becoming technologically obsolete later. The Greenwood-Yorukoglu account matches the evidence presented here - there was great investment into the iron sector, a rise in earnings inequality in that sector, and at least some evidence of a productivity slowdown, to be discussed later. Since in the model employers preferred to hire skilled individuals, the rise in inequality of earnings was generated by a skill bias assumption: that workers with certain preexisting skills apply the new technology more productively than individuals without the skills. Another way this has been put is to take skills and employers understanding as given, and...

Reviews

This ebook can be worthy of a read, and much better than other. I have read and i am certain that i am going to planning to go through again once again in the future. You may like just how the writer compose this book.

-- Mr. Grant Stanton PhD

A whole new eBook with an all new standpoint. It is actually rally fascinating throgh reading through time period. You wont truly feel monotony at anytime of your own time (that's what catalogues are for relating to when you request me).

-- Claire Bartell
